Lab 4 Specifications

Lab-specific Specifications

Proficiency

\square Design plays Für Elise from provided starter code
□ Note durations match the durations specified in the starter code for Für Elise (i.e., the
tune plays at the correct tempo)
☐ Individual pitches are accurate to within 1% across the frequency range (of 220-1000 Hz) (calculations should be provided in the report to verify this)
\square All rests (pauses with no sound) are played properly
☐ Code uses #define macros for memory-mapped registers
☐ Portfolio page includes a video of the system playing the entire song.
Excellence
\square Report contains accurate calculations for minimum duration supported
☐ Report contains accurate calculations for maximum duration supported
☐ Report contains accurate calculations for minimum frequency supported
☐ Report contains accurate calculations for maximum frequency supported
☐ Report provides documentation and calculations to show that the durations and pitches
are correct based on the timer configuration.
☐ Design contains potentiometer to control the output volume.
☐ Design plays an extra composition of your choice. You need not compose the tune from
scratch, it is acceptable to transpose an existing tune.

General Specifications

Schematic Specifications

Proficiency
 □ All pin names labeled □ All pin numbers labeled □ Crossing wires clearly identified as junction or unconnected □ Neat layout (e.g., clear organization and spacing) □ All parts labeled with part number □ All component values present
Block Diagram
\Box Block diagram present with one block per System Verilog module \Box Each block includes all input and output signals
Excellence
General Schematic Specifications
 □ Standard symbols used for all components where applicable □ Signals "flow" from left to right where possible (e.g., inputs on left hand side, outputs on right hand side) □ Title block with author name, title, and date
HDL & Code Specifications
Proficiency
 □ Descriptive filename that matches module name (e.g., lab2_jb.sv) □ One module per file □ Descriptive variable names □ Neat formatting (e.g., standard indentation, consistent formatting for variable names (kebab-case/snake_case/camelCase/PascalCase)) □ Descriptive and clear function/module names □ Comments to indicate the purpose of each function/module

Excellence
\square Name, email, and date at the top of every file
\square Comment at the top of each source code file to describe what is in it
□ Clear and organized hierarchy (e.g., delineation between top level modules and submodules)
☐ Testbenches written for each individual module to demonstrate proper operation
\square Testbench output for each module included in the report
Writeup/Summary
Proficiency and Excellence
☐ Statement of whether the design meets all the requirements. If not, list the shortcomings.
□ Number of hours spent working on the lab are included.
□ Writeup contains minimal spelling or grammar issues and any errors do not significantly detract from clarity of the writeup.

□ (Optional) List comments or suggestions on what was particularly good about the as-

Comments

Add specific notes here about the assignment.

 \square AI prototype attempted and some reflection is recorded.

signment or what you think needs to change in future versions.
